COST: \$7 ea. MSRP: \$14 PACK: 12

Minima-95 sku: ZH-CK-M95  
COST: \$12 ea. MSRP: \$24 PACK: 12

## Help Prevent the Spread of Microbes

Careful Key is made from antimicrobial copper. Use this hooked keychain tool instead of your hands to do simple tasks, like touch a screen, keypad, or open a door handle, while in public places.

Copper alloys have also been shown to kill harmful bacteria. Keep yourself safe and never touch a public handle again.

## Solid Brass & Bronze Construction

Brass containing at least 70% copper (Grip-70) and Bronze containing at least 95% copper (Minima-95). Copper was shown in a study of one strain of a human coronavirus (HuCoV-229E) to inactivate the virus sample in less than 60 minutes. The researchers found a lag of about 10 minutes in inactivation followed by very rapid loss of infectivity. Alloys containing >90% copper inactivated samples of coronavirus in less than 30 minutes

## Made in USA

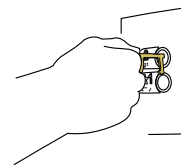

We pride ourselves on our ability to keep both the development and manufacturing of our products under one roof in Portland, ME. We even source our materials from local vendors whenever possible; always using 100% US-based vendors.
